

EVANS MODEL 2480

OVERARM ROUTER

PROVEN A PERFECT FIT
FOR CUTTING
SINK CUT-OUTS IN ALL TYPES OF
COUNTER TOPS.

HIGH FREQUENCY ROUTER
FOR CONTINUOUS USE, AND
CUTTING SOLID CORE
COUNTER TOPS

The Evans Machinery model 2480 Overarm Router is a compact heavy duty system for cutting sink holes in countertops of various materials. The 2480 features a dual pivotal joint design allowing the operator to simply follow the guide template in virtually any pattern. This exceptional design feature aids in reducing operator fatigue, while maintaining product consistency. The 2480 model includes a pneumatically operated clamping mechanism for securing the countertop and template throughout the cutting process.
